00 General	45 Integral equations
01 History and biography	46 Functional analysis
03 Mathematical logic and foundations	47 Operator theory
04 Set theory	49 Calculus of variations and optimal control; optimization
05 Combinatorics	51 Geometry
06 Order, lattices, ordered algebraic structures	52 Convex sets and related geometric topics
08 General mathematical systems	53 Differential geometry
11 Number theory	54 General topology
12 Field theory and polynomials	55 Algebraic topology
13 Commutative rings and algebras	57 Manifolds and cell complexes
14 Algebraic geometry	58 Global analysis, analysis on manifolds
15 Linear and multilinear algebra; matrix theory	60 Probability theory and stochastic processes
16 Associative rings and algebras	62 Statistics
17 Nonassociative rings and algebras	65 Numerical analysis
18 Category theory, homological algebra	68 Computer science
20 Group theory and generalizations	70 Mechanics of particles and systems
22 Topological groups, Lie groups	73 Mechanics of solids
26 Real functions	76 Fluid mechanics
28 Measure and integration	78 Optics, electromagnetic theory
30 Functions of a complex variable	80 Classical thermodynamics, heat transfer
31 Potential theory	81 Quantum mechanics
32 Several complex variables and analytic spaces	82 Statistical physics, structure of matter
33 Special functions	83 Relativity
34 Ordinary differential equations	85 Astronomy and astrophysics
35 Partial differential equations	86 Geophysics
39 Finite differences and functional equations	90 Economics, operations research, programming, games
40 Sequences, series, summability	92 Biology and behavioral sciences
41 Approximations and expansions	93 Systems theory; control
42 Fourier analysis	94 Information and communication, circuits
43 Abstract harmonic analysis	
44 Integral transforms, operational calculus
